

The Engineering Fundamentals range is designed to enable students to gain an understanding of the fundamentals of engineering by the process of learning via hands-on experimentation.

The modular hands-on tray based system is supplied in conjunction with a multifunctional Base Unit enabling the student to conduct their own experiments in subjects such as Statics, Dynamics and Kinematics.

Each kit is supplied with a highly visual user friendly operational guide, enabling the student to understand the theory of the subject by the application of practical experimentation.

AN INNOVATIVE, HANDS ON MODULAR SYSTEM DESIGNED TO ENABLE INVESTIGATION AND THE UNDERSTANDING OF ENGINEERING PRINCIPLES

Description

The EF-1.2 - Moments experiment kit enables students to understand the relationship of weights and beam balance. Different configurations are possible to enhance understanding of the principles of moments, levers, beams and the relationship of distance and forces applied on a beam.

2 trays supplied with EF-1.2

Moments experiments shown, Simple Beam Balance, 2nd Class Lever, Bell Crank Lever, full list on reverse

High quality materials

Features / benefits

- ▶ Applied student learning via building and experimentation
- ▶ Supplied with a detailed instruction manual, covering the theory of moments including multiple practical experiments designed to further develop the students' understanding in this field
- ▶ Hands-on learning
- ▶ Clear and concise pictorial assembly instructions enhance the learning experience
- ▶ Multiple experimental capability per self-contained kit
- ▶ Tool-less assembly

Requirements

Scale

EF-BU

Experiment tray scale

EF-BU scale

EF-WS scale

- ▶ EF-BU on which to build the experiment from the tray components
- ▶ Level and stable work surface to mount the EF-BU upon. The optional EF-WS is ideal for this if no suitable desk or bench is available.

Demonstration / Instructional Capabilities

Simple Beam Balance

Beam Balance with Oblique Force

1st Class Lever

2nd Class Lever

3rd Class Lever

Bell Crank Lever

Beam Reactions

Stability of a Body:

- Stable
- Neutral
- Unstable Equilibrium

Centre of Gravity of a Body by Inclining at a known Angle

Workstation EF-WS

(Trays and Base Units sold separately)

Overall dimensions

Tray x2

Length	0.430m per tray
Width	0.312m per tray
Height	0.080m per tray

Packed and crated shipping specifications

Volume	0.2m ³ per tray
Gross weight	5Kg per tray

Essential accessories / equipment

- ▶ Base Unit EF-BU

Optional accessories

- ▶ Workstation EF-WS

The workstation can be used as a demonstration platform at the front of the classroom, but also doubles up as a storage unit for the experiment trays and EF-BU Base Units.

Castors allow the entire Workstation and its contents to easily be wheeled between classrooms.

The workstation can be configured to store:

- Up to 12 Base Units and a maximum of 18 trays (2 Base Units occupy the space of 1 Tray).
- 12 Base Units and 12 trays.
- 18 trays if storing no Base Units.

- ▶ EF1-SPARES (recommended)

A selection of the most commonly used parts in the EF kits, provided in a durable storage tray which can easily be stored along with the rest of the EF kits. By having a spares kit in the classroom, experiments can be varied. In addition misplaced or damaged items can be replaced quickly without any downtime.
